### REQUIREMENTS FOR THE BACHELOR OF SCIENCE IN MECHANICAL ENGINEERING  
Accredited by ABET, Inc., (formerly the Accrediting Board for Engineering and Technology)  

#### COLLEGE OF ENGINEERING  
THE UNIVERSITY OF OKLAHOMA

For Students Entering the  
Oklahoma State System  
for Higher Education  
Summer 2010 through  
Spring 2011

NOTE: Engineering transfer students may take ENGR 3511 in place of ENGR 1411.

Courses designated as Core I, II, III, IV, or Capstone are part of the General Education curriculum. Students must complete a minimum of 40 hours of General Education courses, chosen from the approved list.

To be chosen from the University-Wide General Education Approved Course List. Three of these 12 hours must be upper-division (3000-4000). See list in the Class Schedule.

In the College of Engineering, in order to progress in your curriculum, and as a specific graduation requirement, a grade of C or better is required in each course in the curriculum. Please refer to the General Catalog and Advising Bulletin Board for additional enrollment limitations.

Students must successfully complete prerequisite courses (with a minimum C grade) before proceeding to the next course.

• Two college-level courses in a single foreign language are required; this may be satisfied by successful completion of 2 years in a single foreign language in high school.

• Students who must take foreign language at the University will have an additional 6-10 hours of coursework.

• A list of Technical, Experimental, and Engineering Science electives is available in the AME Office, FH 212.

• AME courses are sequential and usually offered only in the semester shown. Note prerequisites on the back of this page.

• This course fulfills the Computer Literacy Requirement for graduation as required by the Oklahoma State Regents for Higher Education.

OU encourages students to complete at least 31 hours of applicable coursework each year to have the opportunity to graduate in four years.
COURSES IN AEROSPACE AND MECHANICAL ENGINEERING (AME)

2113 Statics. Prerequisite: Physics 2514 and Mathematics 2433 or concurrent enrollment in Mathematics 2433. Vector representation of forces and moments: general three-dimen-
sional theorems of statics; centroids and moments of area and inertia. Free-body diagrams, equi-
librium of a particle and of rigid bodies, distributed loads, friction and internal shear and
moment loads. Analysis of trusses, frames, and machines. (F)

2213 Thermodynamics. Prerequisite: Mathematics 2433 and Physics 2524, or concurrent
enrollment (in both). First and second law of thermodynamics are developed and applied to
the solutions of problems from a variety of engineering fields. Extensive use is made of differ-
ential calculus to interrelate thermodynamics functions. (F)

2303 Materials, Design and Manufacturing Processes (Crosslisted with Industrial Engi-
neering 2303). Prerequisite: 2113 or Civil Engineering 2113 or Engineering 2113. Mechani-
cal and physical properties of engineering materials. Introduction to design concepts, manufacturing processes and equipment used in engineering. (Sp)

2401 Engineering Computing. Prerequisite: Mathematics 1823 or concurrent enrollment.
Introduction to computer programming and university computing facilities. Program design
and development: computer application exercises in engineering. (F)

2533 Dynamics. Prerequisite: 2113, Mathematics 2433. Dynamics (kinematics and kinet-
ics) of particles and rigid bodies for rectilinear, curvilinear and angular motion; work and en-
ergy methods; conservations of impulse and momentum; introduction to mechanical
vibrations. (Sp)

3103 Interactive Engineering Design Graphics. Prerequisite: Mathematics 1823. Visual-
ization and modeling techniques for product design and development. Design methodology,
graphic standards, projection theory, freehand sketching, spatial geometry, CAD systems,
geometric modeling, and tolerancing. Solving open-ended design and visualization prob-
lems. Laboratory (Sp)

3112 Solid Mechanics Lab. Prerequisite: 2113 or Engineering 2113; 3143 or concurrent en-
rollment. Measurement of displacement: velocity, acceleration, force, torque, strain, stress,
data acquisition and processing; data analysis. Laboratory (F)

3122 Heat Transfer and Fluid Mechanics Lab. Prerequisite: 2113 or Engineering 2113,
3173 or concurrent enrollment. Basic measurement concepts in fluid mechanics and ther-
mal science. Concepts and methods of measuring pressure, temperature, flow, thermal and
transport properties. Data acquisition and analysis. Laboratory (Sp)

3143 Solid Mechanics. Prerequisite: 2113 or Engineering 2113, Mathematics 3113, or
3413 and 3401. Concepts of stress and strain: mechanical behavior of engineering materials;
analysis of uniform stress states; analysis of members in tension; stresses and deflections in
beams; modes and theories of failure; design criteria. (F)

3153 Fluid Mechanics. Prerequisite: 2113, 2213, or Engineering 2113, 2213, Mathematics
3113. Principles of fluid mechanics: fluid statics, flow descriptions, conservation equations,
dimensional analysis, potential flow, viscous flow and internal flow. (F)

3173 Heat Transfer. Prerequisite: 2213 or Engineering 2213, 2313. Heat transfer by con-
duction, convection, and radiation; mass transfer and combined modes of heat transfer. (Sp)

3353 Design of Mechanical Components. Prerequisite: 2303 and 3143. Analysis and de-
sign of mechanical subsystems and selection of elements such as gears, shafts, clutches,
brakes and modern mechanical components. (Sp)

3363 Design of Thermal-Fluid Systems. Prerequisite: 2401 or Engineering 1001, 3153 or
3253, and 3173. Design of fluid flow, heat transfer and energy systems including analysis,
synthesis and optimization. Topics include but are not limited to: ducts and piping systems,
fluid machinery, heat exchangers, thermal storage devices, furnaces, combustors, refrigera-
tion and air conditioning systems. (F)

3G327 AME Numerical Methods for Engineering Computation. Prerequisites: 2401 or
Chemical Engineering 2002, or Engineering 2002 or 2003, or Computer Science 1313 or
1323 and Math 2401. Course covers specific software applications tailored toward
aerospace and mechanical engineering. Basic methods for obtaining numerical solu-
tions with a digital computer. Included are methods for the solutions of algebraic and
transcendental equations, simultaneous linear equations, ordinary and partial differential
equations, and curve fitting techniques. The methods are compared with respect to computa-
tional efficiency and accuracy. Any student who earns credit for P E 3723 cannot receive
duplicate credit for AME 3723, CS 3723, or CH E 3723. This course may not be taken for
grade credit within the College of Engineering. (F)

4163 Principles of Engineering Design. Prerequisite: 2103 or 3103, 2533, 3353. Design
process and methodology from concept through analysis, layout and report. Types of design
problems, human element in design, computer aid in design, specification development,
concept generation, concept evaluation, product generation, function and performance
evaluation, design for manufacturing, design for assembly, design for life-cycle, sustainability,
final product documentation, ethics, safety and economics. (F)

4553 Design Practicum. Prerequisite: senior standing, 3363 and 4163. Design study of ac-
tual problems in industry. Lecture and Laboratory (Sp) [V]

COURSES IN ANTHROPOLOGY (ANTH)

4623 Approaches to Cross-Cultural Human Problems. Prerequisite: 1113 or junior stand-
ing. Introduces students to the complex problems of contemporary global-scale cultures and
helps them better understand their place on this global arena. This course will look at specific
international issues as well as problems, and relate them to processes occurring in many parts of
the world. (Irreg.) [IV-NW]

COURSES IN COMMUNICATION (COMM)

3513 Intercultural Communication. Prerequisite: 1113 and junior standing. Introduction to
intercultural communication theory, research and selected applications. Topics include conceptual-
izing intercultural communication theoretically, trends in research, diffusion of innovation, na-
tionality barriers and training for foreign assignments. (F, Sp) [IV-WC]

COURSES IN ENGINEERING (ENGR)

1411 Freshman Engineering Experience. Prerequisite: declared major in Engineering or permis-
sion of instructor. Required of all entering freshmen with a declared Engineering major. Lecture
hours cover a variety of topics including: majors and minors; career planning; advising; and ex-
teresting career activities. Students also work on multi-disciplinary engineering projects in smaller
groups during the lab hour. (F)

2002 Professional Development. Prerequisite: sophomore standing. Develop an understanding of
engineering ethics, teamwork, leadership, and professional responsibility through the concepts
of contemporary, social, and global issues. (F, Sp)

2431 Electrical Circuits. Prerequisite: Mathematics 2423 and Physics 2524 or concurrent en-
rollment. Introduction to basic principles of electrical circuits. Topics include circuits (DC circuits,
AC circuits, resonance, AC transients, DC transients) static electrical fields, static magnetic fields,
and electronics (diodes, operational amplifiers). (F, Sp)

2531 Electrical Circuits II. Prerequisite: 2431. Introduction to intermediate principles of electrical
circuits. Topics include amplifiers, filters, signal conditioning, A/D and D/A conversion, and con-
version digital and analog circuits. (Sp)

3431 Electromechanical Systems. Prerequisite: 2431 and 2531. Introduction to basic principles of
electromechanical systems. Topics include physical principles of sensing and actuation, types of
sensors and actuators, and interfacing and communication protocols. (Sp)

COURSES IN ENGLISH (ENGL)

3153 Technical Writing. Prerequisite: 1213 and Engineering or hard science majors only. For
students of the pure and applied sciences. Focuses on the forms of report writing most frequently
encountered in research and industry. (F, Sp, Su)

COURSES IN MATHEMATICS (MATH)

1823 Calculus and Analytic Geometry I. Prerequisite: 1523 at OU, or satisfactory score on the
placement test, or, for incoming freshmen direct from high school, satisfactory score on the
ACT/SAT. Topics covered include equations of straight lines; conic sections; functions, limits and
continuity; differentiation; maximum-minimum theory and curve sketching. A student may not re-
cieve credit for this course and 1743. (F, Sp, Su) [I-M]

2423 Calculus and Analytic Geometry II. Prerequisite: 1823. Integration and its applications; the
calculus of transcendental functions; techniques of integration; and the introduction to differential
equations. A student may not receive credit for this course and 2123. (F, Sp, Su) [I-M]

3433 Calculus and Analytic Geometry III. Prerequisite: 2423. Polar coordinates, parametric
equations, sequences, infinite series, vector analysis. (F, Sp, Su)

2443 Calculus and Analytic Geometry IV. Prerequisite: 2433. Vector calculus; functions of several
variables; partial derivatives; gradients, extreme values and differentials of multivariate functions;
multiple integrals; line and surface integrals. (F, Sp, Su)

†G3113 Introduction to Ordinary Differential Equations. Prerequisite: 2423. Duplicates two
hours of 3433. First order ordinary differential equations, linear differential equations with constant
coefficients, two-by-two linear systems, Laplace transformations, phase planes and stability. (F, Sp, Su)

COURSES IN PHYSICS (PHYS)

2514 General Physics for Engineering and Science Majors. Prerequisite: Mathematics 1823 or
Mathematics 1914 with grade of C or better. Not open to students with credit in 1205. Vectors, ki-
nematics and dynamics of particles, work and energy systems of particles, rotational kinematics and
dynamics, oscillations, gravitation, fluid mechanics, waves. (F, Sp, Su) [B-NL]

2524 General Physics for Engineering and Science Majors. Prerequisite: 2514 and Mathematics
2423. Not open to students with credit in 1215. Temperature, heat, thermodynamics, electricity,
magnetism, optics. (F, Sp, Su)

†G3223 Modern Physics for Engineers. Prerequisite: Mathematics 3113 or equivalent. Relativity,
atomic structure, nuclear theory, wave mechanics, statistical physics, solid state physics. (F)
